DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. The Office action is in response to the Pre-Appeal brief request filed on 8/29/2005. Claims 1-25 are pending, Claims 1-4 and 21-25 are canceled. Claims 5-20 are pending in the application.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 5-10, drawn to control method on a cache hit for counting a number of access to a cache line that caused the hit and building and storing instruction segments if the count meets a predetermined threshold, classified in class 711, subclass 154.
 - II. Claims 11-20, drawn to a structure of a cache or an access filter, classified in class 711, subclass 118.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant

Art Unit: 2185

case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombinations are not essential to the combination. The subcombination has separate utility such as the patentability of a control method on a cache hit with the segment builder does not rely on the detail structure of a cache with address decoder, incrementor, count field and transmission gate.

4. Because these inventions are not only distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, but also distinct for the reasons that search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to William E. Curry (Reg. No. 43,572) on October 19, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2185

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Allowable Subject Matter

7. Claims 5-10 are allowed.
